Profile Summary

Motivated and detail-oriented software developer. Excited to leverage a varied skillset from over a decade of previous experience in healthcare, customer service, childcare, and janitorial roles into software development. Driven by a passion for creating solutions and developing software that address complex challenges. Proficient in multiple programming languages, software development methodologies, and database management systems. Experience designing, testing, developing, and deploying applications. Strong organization and problem-solving skills, excellent communication, empathy, and integrity, enabling effective collaboration in team-based environments. Enthusiastic professional ready for hire, let's connect.

Diploma in Computer Science and Fullstack Web Development

- Completing 20-month immersive, hands-on, project based curriculum.
- Fundamentals of computer science and web development.

Volunteer Experience

Techlahoma - 200OK

2023

Techlahoma - Tulsa Web Devs - Co-organizer

2024

Techlahoma - SheCodesTulsa - Co-organizer

2024

Projects

Museum of Imagination - T3 Hacksprint

- Website collaboration. I created the 2 Galleries including design, menus, audio, and movement. I also handled part of the animations for homepage including rolling clouds and blinking windows.

Breakfast Bites & Bytes - T2 Hacksprint

- Breakfast Recipes and Breakfast Arcade. Collaborated on the over all design with Trello and Slack. I created the arcade game. I worked on the recipe page design, chose assets, also made slide presentations

Smiling School

- Built an interactive and responsive website from a Figma Designer file.

Simple Shell

- Implementation of a simple UNIX command interpreter written in the C programming language. Program uses bash commands it retrieves from the command line interface (CLI) that are input by the user.

Work Experience

Brookdale Senior Living

Weatherford, Oklahoma

July 2014 - March 2018

Certified Nursing Assistant / Advanced Medication Aide / Business Office Manager
